Become a McFarland Cascade Certified Contractor at the JLC show

TACOMA, Wash.—At the JLC show Nov. 9-10, contractors can learn more about McFarland Cascade's premier deck systems and get their Contractor Certification, which can lead to greater sales.

Certified Contractors can access lead-generating co-op advertising opportunities, our website's local contractor locator, sales and marketing support and free CadQuest deck design and estimation software.

Our premier decking and rail line includes:

- **Xtendex®**—A rice hull-based composite that naturally resists insects and mold featuring the Quick Clip no-visible-screw building system.
- **Stonedeck™**— Light weight natural stone tiles backed with a high-strength composite made for above ground 16"OC deck frames.
- **Extreme Tropical Hardwoods**—When nothing but real wood will do, these moisture and bug resistant hardwoods offer rich colors and dramatic grains.

To get certified, stop by booth 536. For more product information, call (800) 426-8430 or visit www.mcfarlandcascade.com.
